

## Problem Set Week 4

Math Olympiad Club Zurich

Spring 2025

### Problem: unknown

Find all real solutions to the equation

$$9^x + 4^x + 2^x = 8^x + 6^x + 1.$$

### Problem: 2 Bernoulli Competition 2023

Let  $e$  be Euler's number. Show that for any odd prime  $p$ , the integer

$$1! + 2! + 3! + \cdots + (p-1)! - \left\lfloor \frac{(p-1)!}{e} \right\rfloor$$

is divisible by  $p$ .

### Problem: Example p.140 PUTNAM and BEYOND

Find all real solutions to the equation

$$4^x + 6^{x^2} = 5^x + 5^{x^2}.$$

### Problem: 3 Bernoulli Competition 2023

Let  $n \geq 1$  and  $A$  be a  $n \times n$  symmetric matrix over  $\mathbb{F}_2 = \mathbb{Z}/2\mathbb{Z}$  with  $1_{\mathbb{F}_2}$ 's on the main diagonal. Show that the vector composed uniquely of  $1_{\mathbb{F}_2}$ 's is in the image of  $A$ .

### Problem: unknown

Find all differentiable functions  $f : \mathbb{R}_{>0} \rightarrow \mathbb{R}_{>0}$  having at least one fixed point  $\alpha \in \mathbb{R}_{>0}$  satisfying:

$$f' = \frac{f}{f \circ f}.$$

**Bonus:** What happens if  $f$  has no fixed point?
